

Manufacturers' Association Pleads For Home Industries

THE following list of articles made in this state has been compiled by the manufacturers' association of Utah, the catalogue being as complete as the data at hand could make it. Suggestions in the way of additions will be thankfully received, for use in future compilations. It is not asked that preference be given to home products simply because they are made here. In nearly every instance it will be found that Utah manufactures compare favorably with the best from elsewhere, both in quality and in price. This being true, the home industry phase should be a strong factor to induce home people to buy them. It is safe to say that if more liberal patronage were bestowed upon the factories of this state, there need not be an idle man nor woman in Utah. A serious problem confronts the commonwealth in the matter of furnishing the fast increasing population with means of gaining a livelihood. Loyal support of industries already here will insure the establishment of others so much needed. New ones can scarcely be expected, if old ones are indifferently patronized. The suggestion to support home industries should be followed, not

merely in theory, but in practice. The advice is good for everybody and should not be considered as meaning the "other fellow." Buyer, ask your dealer to furnish you home-made articles. Retailer, insist that jobbers fill your orders with the products of local manufacturers, whenever possible. Just a word as to the Manufacturers' association of Utah. The organization is composed of representatives of some of the largest and most progressive manufacturing concerns of the state. Its members are working with might and main to exploit home industries. Their efforts are not selfish, by any means, for whatever of success attends such labor will accrue to the benefit of every resident of Utah. The articles in the accompanying list preceded by a star or a hyphen are produced by members of this association. If their goods are equal in quality and price with other similar goods, it is respectfully asked that they be given preference. Individuals, firms or corporations that spend time and money in ways that benefit the public should be recognized and preferred to the selfish and tight-fisted who show a disposition to care for nothing but their own affairs.

Articles marked thus * and -, are produced by respective members of the Manufacturers' association of Utah. Quality and price being equal to others, it is respectfully asked that these be given preference by wholesaler, retailer and consumer.
Zinc etchings.

OF INTEREST TO FARMERS AND MECHANICS.

Farmers and mechanics frequently meet with slight accidents and injuries which cause them much annoyance and loss of time. A cut or bruise may be cured in about one-third the time usually required by applying Chamberlain's Liniment as soon as the injury is received. This liniment is also valuable for sprains, soreness of the muscles and rheumatic pains. There is no danger of blood poisoning resulting from an injury when Chamberlain's Liniment is applied before the parts become inflamed and swollen. For sale by all druggists.

KINDERGARTEN OFFICERS.

Mrs. C. E. Richards Chosen President;
Mrs. E. V. Silver Vice-President.

The annual meeting of the Salt Lake Free Kindergarten society was held on Wednesday morning, at the home of

Mrs. Charles W. Watson, 131 Second East, at which the following officers were elected to serve for the ensuing year: Mrs. C. E. Richards was chosen president; Mrs. E. V. Silver vice president; Mrs. Elmer Jones, secretary; Mrs. John K. Hardy, assistant secretary; Mrs. Simon Bamberger, treasurer; and Mrs. Charles W. Watson, assistant treasurer. The retiring president was Mrs. L. E. Hall, who has been most efficient.

The school is under the direction of Miss Schofield, who has had a great deal of experience in kindergarten work. She has fitted up two rooms at 288 south Fourth West, where there has been an attendance of from 15 to 25 children. About a week ago they were the guests of University kindergarten, being taken up there in the automobiles of two or three prominent men of the city.

The officers as well as the teachers feel much encouraged at the year's report, and they hope to make a still better showing during the coming year. The institution is kept up by subscriptions obtained by the ladies who are at the head of the society.

The scent of roses pervades the breath of the girl that takes Hollister's Rocky Mountain Tea. Bright eyes, red lips, good health follow its use. 35 cents. Tea or Tablets. Goddard-Pitts Drug Co.
